Portfolio: msicard.dev

TECHNICAL SKILLS

Languages Java, Python, Javascript, HTML5, CSS3 **Frameworks / Libraries** Flask, Jinja2, Express, React, Bootstrap, Tailwind, Material UI, Node.js, JSP, Mongoose, NPM, Spring Boot, Maven, Apache, Bcrypt **Databases** MySQL, MongoDB, SQL **Version Control Systems** Github, GitBash, Git **Tools** Postman, Trello, Amazon EC2, AWS

RELEVANT EXPERIENCE

Client | Full-Stack Developer | [Deployed Site](#) | [GitHub](#)

Website I created for my sisters wedding, built with MongoDB, Express, Next.js and Node.js

- Developed a dynamic and responsive full-stack web application utilizing the MERN (MongoDB, Express.js, React, Node.js) stack, ensuring seamless user experiences from front-end to back-end.
- Deployed the website seamlessly using Vercel, ensuring continuous deployment and rapid iteration.

Client | Front-End Developer | [Deployed Site](#) | [Github](#)

Demo Website created for a client's new clothing line, built with Next.js and Tailwind.

- Implemented responsive design principles to ensure optimal user experience across devices.
 - Leveraged Next.js for server-side rendering and optimized performance.
 - Utilized Tailwind CSS for efficient styling and rapid development.
-

TECHNICAL PROJECTS

LFG | FullStack Developer | [Deployed Site](#) | [GitHub](#)

Social networking site for gamers, built with Python, Flask, Jinja2, MySQL

- Leveraged Python's strengths to create a robust web application that efficiently handled user requests, data processing, and interactions while maintaining a coherent and maintainable codebase.
- Employed Flask, a micro web framework, to efficiently handle routing, request handling, and database integration, enabling streamlined development and efficient data management.

LinkList | FullStack Developer | [Deployed Site](#) | [GitHub](#)

LinkTree Clone built with Next.js, Tailwind and Supabase

- Engineered a dynamic and responsive full-stack web application using Next.js, Tailwind CSS, and Supabase, ensuring a seamless user experience from front-end to back-end.
- Utilized Vercel's platform to deploy the application, optimizing the deployment process for seamless efficiency.

Endangered Animals | FullStack Developer | [Deployed Site](#) | [GitHub](#)

An endangered animal awareness website, built with MongoDB, Express, React and Node.js

- By leveraging React's component-based structure, achieved a more organized and extensible codebase, expedited development cycles through reusable components, and maintained a consistent user interface.
 - Achieved a polished and user-friendly application interface that combined the efficiency of Tailwind CSS with the familiarity and aesthetic appeal of Material-UI, delivering a cohesive user experience.
-

EDUCATION

Coding Dojo | Full-Stack Developer Certificate | Remote

Dec. 2022

- An immersive 4-month full-stack web development bootcamp that specializes in Python, Java, MERN (MongoDB, Express, React, Node.js)
- Spent 1000+ hours on intensive coursework through all phases of project development of full-stack applications including building, testing, debugging, and deploying.
